General

Layouts:

You have the following options:

- Use our standard layouts from the online shop (please let us know which in the remarks).
- Send us your logos, with instructions as to where to place them in the remarks.
- Send us your own layout, ready to go. Please make sure they follow these specifications:

Technical specifications:

Color space: CMYK (no spot colors)
Profile: ISO Coated v2
Resolution: 300 dpi
File format: PDF (with embedded fonts or vectorized texts)
AI/EPS (send fonts and images)
JPG/PNG/PSD/TIFF
INDD (send fonts and images)

Personalization data:

Send us the event ID or an excel file.

Layout templates:

Templates for InDesign, Photoshop and Illustrator are available for download in this document for every product. Simply click on the download link  on the correct page.

RACE RESULT URL:

Please note that the URL “www.raceresult.com” is printed by default on all bibs we produce.

If you do not want the URL to appear on your bibs, you must write it explicitly in the comments when placing your order.

Standard fonts:

Bibs: Helvetica Neue LT Com 97 Blk
Road Bike Plate: Tungsten Semibold
Personalisation: Arial bold

If you would like another font on your bibs, please write it down in the description of your layout, and upload the font file in .otf or .tff format.

DO NOT include the following elements in your layout:

- Place holder for the bib number
- Place holder for personalization (e. g. firstname)
- Punch holes
- Rounded corners
- Outline of the end format

The RACE RESULT Team will place these for you.

Special Perforation/Die-Cut

New orders:

Select the corresponding option under “Special Perforation/Press Cut” when ordering your race numbers through the online shop. There are two options.

Reordering an existing cutting die:

After you have bought a special perforation/punch from us, we will create an extra product for you in the shop that you can select directly for your next order.

Note that in both cases the production time will increase.

Production Note

An offset of up to 2 mm (1/16”) can occur during cutting of the final format, also differences of up to 1 mm (1/32”) can occur during printing. The trim is used to negate the differences from cutting and printing.

Important Notice Regarding the Production Process:

You will receive a preview for all printed products (except for regular bibs and RACE RESULT bibs), that you need to approve for printing. It is not possible to change anything after you have approved the preview.

Standard Backside Print

For bibs/MTB plates with transponders, the back looks as follows as standard. The positions of the transponders vary to make optimal use of the space in the box and less shipping costs as possible.

This option does not cost anything extra.

A5 Single

A5 Duo

MTB A5 Single

Standard back print with individual text on top

This option is identical to option 1, with the only difference being that the upper red area can be individually printed. In the red area, it is still possible to place a graphic or text in black and white at no extra cost. Color printing is possible for an additional charge.

Please select this option in the shop under "Back print".
You can download the design templates on page 5.

A5 Single/Duo

Red area: 174 x 12 mm / 6.85 x 0.47"

Special Size Single/Duo

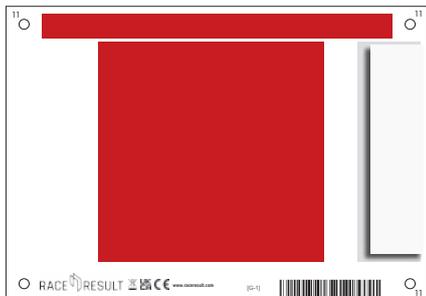

Red area: 194 x 62 mm / 7.64 x 2.44"

Individual back print with standard transponder positions

For an additional charge, it's possible to individually design the back of the bibs/MTB plates with a transponder in the marked red areas. With this option, the positions of the transponders change as with the standard option and your individual design/texts will move too.

Please select this option in the shop under "Print back".
You can download the design templates on page 5.

A5 Single/Duo

Red area top: 174 x 12 mm / 6.85 x 0.47"
Middle part Duo: 76 x 110 mm / 2.99 x 4.33"
Middle part Single: 120 x 110 mm / 4.72 x 4.33"

Special Size Single/Duo

Red area top: 194 x 62 mm / 7.64 x 2.44"
Middle part Duo: 96 x 110 mm / 7.64 x 4.33"
Middle part Single: 134 x 110 mm / 5.28 x 4.33"

Individual back print with only one transponder position on the edge

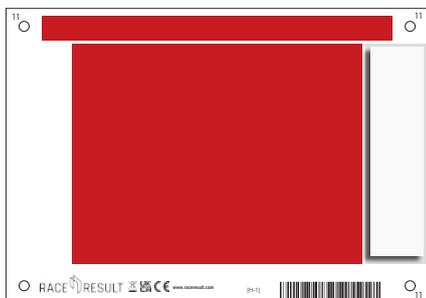

For an additional charge, it is possible to individually design the back of the bibs/MTB plates with a transponder in the marked red area.

With this option, there is only space for the transponder on the outer edge, so the individually designable area is larger than in option 3 and fix in the middle.

The shipping costs automatically increase with this option in the shopping cart, as the number of boxes increases due to the reduced positions of the transponders.

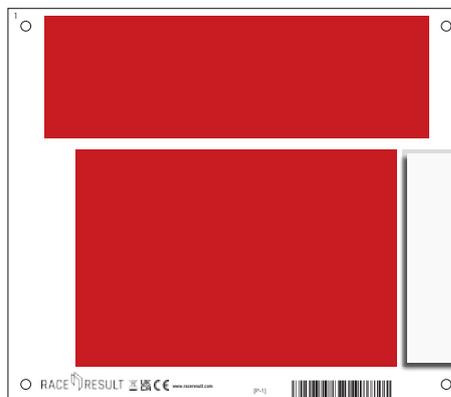

Please select this option in the shop under "Print back".
You can download the design templates on page 5.
